Robotic lawnmower R70Li

Commercial Reference: 4072-20
Article number: 967 16 89-03
EAN: 4078500407205

NEW!

The innovative GARDENA robotic mower R70Li does your mowing for you: it mows the lawn on its own, while you enjoy your free time or do other things. Thanks to its free and natural movement, the R70Li mows a lawn area up to a maximum of 700 m² – effectively, reliably and without wheel ruts. Always resulting an excellently cared-for lawn. When required, the robotic mower recharges itself at the charging station. Its easy-to-place boundary wire shows the R70Li where to mow. It repeatedly cuts grass tips with razor-sharp blades; grass clippings remain on the lawn as a natural fertiliser (mulch principle). A skid plate is ensuring a better protection of the blades in rough circumstances. The cutting height of 2 to 5 cm can be easily set with a rotary knob. With a weight of eight kilograms, the robust robotic mower tackles inclines up to 25 %.

Programming is incredibly simple and quick. Different mowing times or days can be set on the large selection panel and display. Following the menu is easy and intuitive. After programming, the R70Li starts on its own at the set times,

EFFORTLESSLY MOW – AND ENJOY YOUR FREE TIME

LOW-NOISE, EMISSION-FREE

IDEAL FOR MORE COMPLEX LAWN AREAS

WORKS ALSO DURING RAIN

ANTI-THEFT PROTECTION

	R70Li
Working area capacity	700 m² +/-20% / 0.17 acre +/-20%
